

August 2011

Dear Former Assumption School Student,

During the past two years, Assumption School has been going through a period of transition and updates. To name a few, Assumption has a new principal, new computers and has added classes for pre-school children. We are in the process of modernizing and moving the library, we've added a playground and the curriculum is being restructured in several subjects.

While the current parent group is continuing the work you and your families began years ago, we need to ask for your involvement once again. All of those whom have been a part of the *Assumption School Family* have gained so much from the Catholic education and value systems acquired while there. We feel it is important for this community and for future students to have those same opportunities.

At this time, we are asking for your help to assure this tradition carries forward well into the future. Assumption's enrollment is growing, but we need a bit of financial assistance until all the pieces are in place. With competition from shiny new public schools, we believe the values taught at Assumption are so important in the present time as well as for years to come. Our principal, Charlotte Brafford and the Parent Association are working together to expand the offerings to assist in building stronger spiritual and academic programs at Assumption School.

We hope that you will consider a small three-year pledge to help the school directly. Every dollar will help us to keep Assumption School an ever growing, viable option for area families who want their children to have a quality education as well as the Catholic values that are taught and reinforced everyday.

Please consider an annual pledge of \$25, \$50, \$100 or more

With appreciation for your time and consideration,

Michelle Winchell Edgar, President, Assumption Parent Association  
Tiffini Foss, Vice President, Assumption Parent Association  
Stacy Digello, Treasurer, Assumption Parent Association  
Nicole Anderson, Secretary, Assumption Parent Association
